Hello there,

A little bit about me, my name's Al Bondad, and I'm a developer based in Illinois with 1 year of experience working with small companies and startups doing contracted development. I enjoy working with new technologies, learning new skills, and finding new solutions to get the job done.

Regarding my experience, I've worked in several different roles. I've been with Zaner, a financial service company as a contracted **UI and UX Developer**, helping to build the front end of their web applications and providing application designs. After that, I worked with Lifetime UI, an organization focused on developing a React UI library, as a **Web Developer** working with the lead developer and designer in developing some of the UI components. After that, I worked with Halo, a startup focusing on connecting researchers with funding, as a **Full Stack Developer Intern**, updating and maintaining their web platform. I've also worked with Gyst Audio, a startup audio service company, starting as an intern, and continuing as a contracted **Front End Developer**, working on web related projects, such as building an embedded media player for clients, developing a web application to help automate a review process, and designing an analytics dashboard for clients and in house narrators. I even assisted other interns with their projects.

Regarding my current skills, I have experience with technologies such as **React, Node, Express, Webpack, jQuery, Bootstrap CSS, Javascript, HTML, and CSS**. I also have experience with **Git, GitHub, and GitLab,** and some familiarity with **Ruby on Rails, C++, Java, Python, and Sass**. I've also used **Adobe XD and Figma** when working with design files.

You can view my work and project experience I attached in my resume, along with links to my portfolio, LinkedIn, GitHub, and other contact information. If you have any questions about me, please don't hesitate to leave a message!

I enjoy new challenges and experiences and would be pleased to learn more about this position, and I hope I can use this opportunity to be a future asset to your organization.

Thank you for your time and consideration.

Regards,
Al Bondad
